# STRENGTH in NUMBERS

An In-Depth Look  
at Actuarial Science  
for **Math Enthusiasts**

Your Guide  
to Having  
the Right Kind  
of Education

CHLOE HUNG

## THE BOOK

### DESCRIPTION

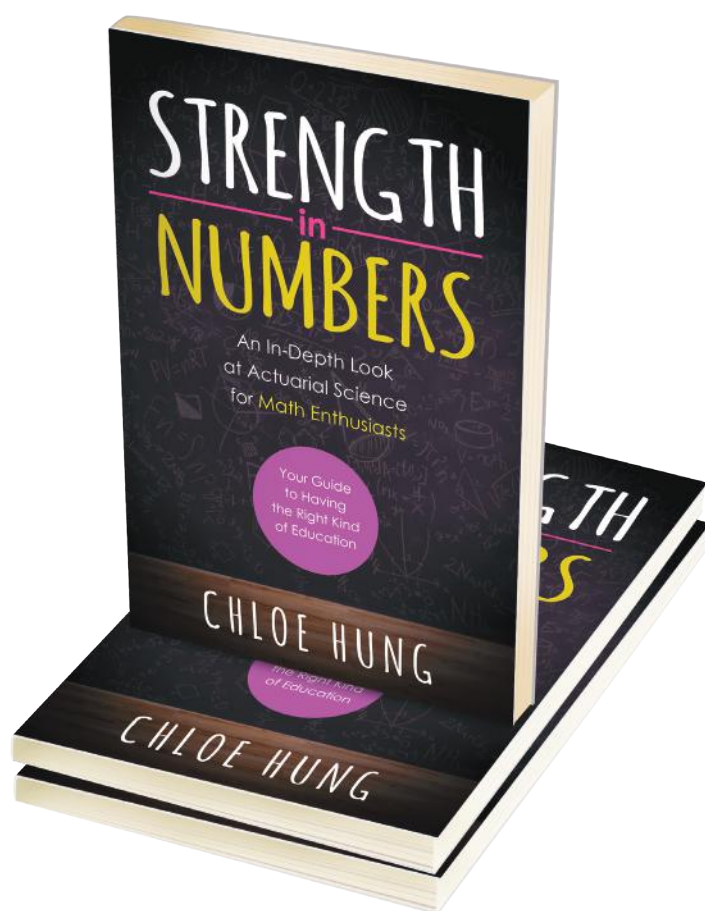

Are you someone who is really passionate about math? Trying to look for a college major that is closely related to your passion for math? Are you frustrated by the limited options available for math enthusiasts? Is math going to be your true passion in the long run?

Many students have a tough time deciding on their college degree and they fear making the wrong choice. Some are really passionate about math but are not sure which path to pursue in the university. There are also students who decide to switch majors halfway through. Put your fears to rest, because actuarial science may be just the option you've been looking for!

If you have the desire to take on a challenge and pursue your math passion, *Strength in Numbers* is the book for you. Even actuarial students may benefit from the practical tips and useful insights about the actuarial industry.

### LEARN HOW...

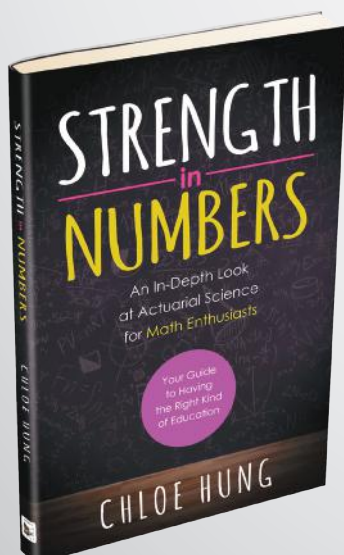

- You will see the power of self-motivation and determination to help you through your indecision and fear.
- Learn how to embrace your passion for math and position yourself as an authority in this field.
- Be prepared for the many challenges that may come up.
- Enjoy your university journey and your career path.

## THE BOOK

### UNCOVER IN THESE PAGES...

- Pursue your math passion in the world of actuarial science.
- Learn what the actuarial profession really is.
- Understand the requirements necessary to become an actuary.
- See the benefits in pursuing a university degree in actuarial science.
- Find inspiration in other people's success and achievements.
- Boost your quantitative and analytical skills.
- Challenge yourself to remain motivated and focused.
- Meet various math geniuses in your university journey.
- Explore common misconceptions about actuarial science.
- Think like an actuary.
- Decide whether or not you would like to take on the challenge of becoming an actuary.

## THE AUTHOR

Chloe Hung is an actuarial science and finance graduate from the USA. She loves a challenge and has a passion for mathematics. Chloe received top scores in math in high school and passed all of her exams with flying colours. Upon high school graduation, Chloe heard that actuarial science was one of the most difficult university degrees to pursue. This prompted her to be one out of only two students from her high school to pursue it.

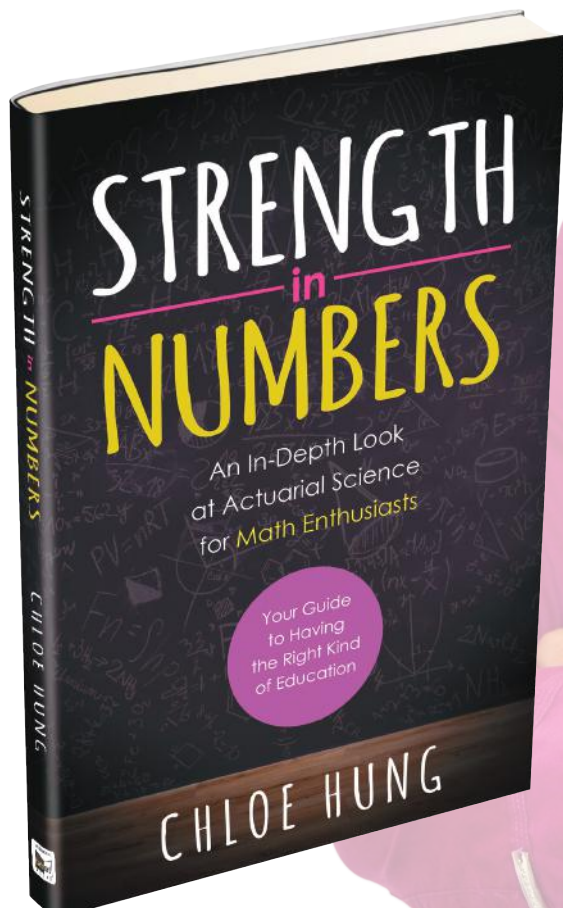

She encountered her first failure when attempting her first actuarial professional paper. Her second failure was her second attempt on that same paper. Tenacious and refusing to give up, Chloe worked harder and succeeded on her third attempt at that project. Her second paper required only two attempts. Chloe's persistence in her professional exams allowed her to complete her university degree with two actuarial professional papers in hand. One year after her university graduation, Chloe completed two more papers, getting better each time!

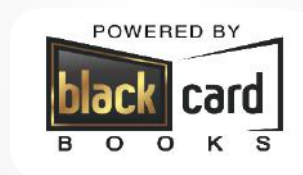

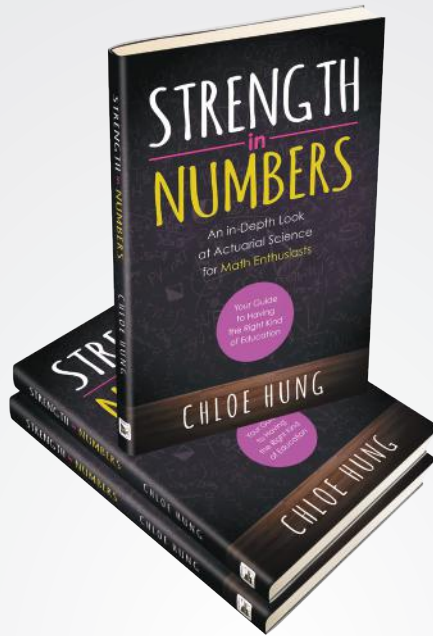

Chloe hopes to help math enthusiasts and actuarial students decide if actuarial science is the right pursuit for them. Actuarial exams are not for the faint of heart. Chloe believes—and knows from first-hand experience—that a good, successful actuary must have the passion, the right mind-set, the right attitude, and a lot of determination. With light-hearted language, she has penned her book to help students understand what being an actuary really means. She hopes to inspire passionate actuarial students, to keep pushing them toward success in their actuarial exams, and even to meet them in their actuarial journey.
